TieEdu Placement Prep Path

From 2nd Year to Placement — One Journey, One Complete System

> *"Every year, over 10 lakh B.Tech students graduate. Placement only happens for those who start at the right time — with the right system."*

What is this document?

This is your **2-year preparation blueprint** — month-by-month, course-by-course, assessment-by-assessment. This is not a brochure; this is the exact plan you will follow from Day 1 until the offer letter arrives.

Who is it for	B.Tech 2nd year students — CSE/IT/ECE/EEE/CS branches + non-CS branches with bridge support
When to start	From your 2nd year (3rd semester) — through the 4th year placement season (Aug–Dec)
What you get	23+ full courses · weekly contests · weekly assignments · monthly skill tests · 6 mock drives · 6 mock interviews · 3-stage resume review · report cards · certificates · cohort batch
Model	**One-time purchase — no monthly subscription**
Access	24 months, or until placement is confirmed (whichever is earlier)

PART A — WHAT IS GOING WRONG (And How It Won't Happen to You)

The Problem: Why does placement preparation fail?

#	Real Problem	Root Cause
1	*"I started DSA, but I have no idea how far I've come"*	No structured milestones — just random YouTube playlists
2	*10 subscriptions — one for DSA, one for aptitude, one for mocks*	Nothing in one place, everything scattered, progress fragmented
3	*Panic at the end of 3rd year — "What do I do now?"*	Late start — 18 months of work can't fit into 6 months
4	*Bought a self-paced course, stopped after 3 months*	No cohort, no accountability, no deadlines = dropout
5	*Resume built 1 day before the interview*	Projects, GitHub, LinkedIn — all last minute
6	*Didn't even know about mock interviews before the real one*	First interview = first attempt = 50% chances gone
7	*No idea about service company vs product company*	Same content everywhere — no clear target

The Solution: Placement Prep Path

A **2-year preparation operating system** — where what to do every week is decided in advance. You just follow it; the system tracks everything else.

```
❌ WITHOUT THE PATH                    ✅ WITH THE PATH
──────────────────                     ──────────────────
What to study? — unknown        →      Every week's plan is ready
How much time? — guesswork      →      1.5–2 hrs/day fixed rhythm
How's my progress? — unknown    →      Monthly report card + skill radar
Interview ready? — unknown      →      Phase gates + mock interviews
Accountability? — alone         →      Cohort batch + streak + leagues
When to build resume? — unknown →      Resume v0 (from Month 1)
```

PART B — BIG PICTURE: 24 MONTHS, 4 PHASES

	Phase 1	Phase 2	Phase 3	Phase 4
Name	Foundation	Core Mastery	Specialize & Interview	Placement War Mode
Months	1–6	7–12	13–18	19–24+
Focus	Learn + build habits	Interview-level core	Choose track, grab internships	Convert to offer letter
Daily time	1–1.5 hrs	1.5–2 hrs	2–2.5 hrs	2–3 hrs (flexible)
Gate	Month 6 end	Month 12 end	Month 18 end	—
Certificate	📜 Foundation	📜 Core Mastery	📜 Interview Ready	📜 Graduate + Alumni

PART C — A TYPICAL WEEK (Same Rhythm for 2 Years, Never Breaks)

This rhythm **is the actual product** — courses are available everywhere; cadence is not.

Day	Activity	Time	What You Get
Every morning	🌞 **Daily Quiz** — 1 question, in-app	60 sec	Streak 🔥 + XP + habit
Mon–Fri nights	📖 Path week's lessons + practice	1.5–2 hrs	Concepts + hands-on coding
Saturday 8 PM	🏆 **Weekly Coding Contest** — 3 problems, live timer	2 hrs	Rank + leaderboard + speed
Sunday	📝 **Weekly Assignment** submit (code/project/written)	2–3 hrs	Score + mentor feedback
1st weekend of month	🧪 **Monthly Skill Test** — scored, topic-wise	1.5 hrs	Skill radar movement + cert threshold
Month end	📊 **Report Card** — auto-generated	10 min	Improvement % + weak topics + next month plan

Streak System (2 Years of Consistency Proof)

Streak	Milestone	Reward
7 days	🔥 "Week Warrior"	Badge + XP
30 days	🔥 "Month Machine"	Badge + XP + league promotion
100 days	🔥 "Century"	Badge + XP + wall of fame
365 days	🔥🔥 "Year One Legend"	Exclusive badge + mentor shoutout

Freezes: 2 automatic streak freezes every month — for exams, illness, family functions. Life happens; the system understands.

Cohort Psychology (You Won't Fight Alone)

- You enroll with your **grad-year batch** (e.g., PPP-2028-Batch-3)
- **Monthly XP Leagues:** Bronze → Silver → Gold → Champion — resets every month (hope stays alive)
- **Collective stats:** "This month the batch solved 4,231 problems"
- **Wall of fame:** Internships, offers, contest winners — everyone sees them

---

PART D — PHASE-WISE DETAILED ROADMAP

PHASE 1 — FOUNDATION (Month 1–6)

> **Goal:** Solid programming + DSA basics + the daily reading habit — which 90% of students never build.
>
> **Gate exam at the end of Month 6 — pass and earn the Foundation Certificate + unlock Phase 2.**

Month 1–2: Programming Foundations

Course	What You'll Learn	Why It Matters
🟢 **Coding Foundations** *(free bonus)*	What a program is, variables, loops, functions, debugging	For students starting from zero
🔵 **C Programming: From First Program to Pointers & Data Structures**	Pointers, memory, structs, linked lists — the backbone of interviews	Asked directly by service + product companies
🔵 **Git & GitHub Mastery**	Branches, PRs, collaboration, portfolio setup	Daily tool for every developer
🔵 **Linux & Shell Basics**	Terminal, commands, shell scripting	Direct questions in service company interviews

Month 1 Deliverables:

- ✅ Baseline Skill Test (Day 7) — current level mapped, weak topics identified
- ✅ Resume v0 — basic template, built right on the platform
- ✅ GitHub profile live + 10+ commits
- ✅ LinkedIn optimized

Assessments: Skill Test #1 (Month 1 end) · Contests #1–8 (easy level) · Assignments #1–8

Month 3–4: Python + DSA Begins

Course	What You'll Learn
🔵 **Python Programming: From First Script to Packages, Classes & Testing**	Modern Python — AI/automation all runs on it
🔵 **DSA Mastery for Interviews — Part 1**	Arrays, Strings, Two Pointers, Sliding Window, Recursion

Contest level: Medium problems begin (Saturday 8 PM live) **Assignment style:** 1 coding assignment per week — auto-graded + feedback

Month 5–6: CS Core Begins + Aptitude Begins + Project 1

Course	What You'll Learn
🔵 **Operating Systems**	Processes, threads, deadlocks, memory — a must for interviews
🔵 **Aptitude Bootcamp — Part 1**	Numbers, %, T&W, Profit-Loss, Time-Speed-Distance
🔵 **Excel for Students**	Data handling — useful in internships + non-tech rounds

🚩 Month 6 End: PHASE 1 GATE EXAM

- Full syllabus test: programming + DSA basics + OS + aptitude basics
- **Pass (≥60%)** → Foundation Certificate + Phase 2 unlock
- **Fail** → Move on with a bridging plan (don't stop — it's a soft gate)

Month 6 Milestone:

- 📜 Foundation Certificate
- 50+ DSA problems solved
- 25+ contests attended
- 24+ assignments submitted
- Resume v0 ready
- Upward trajectory on the skill radar

PHASE 2 — CORE MASTERY (Month 7–12)

> **Goal:** Interview-level DSA + complete CS core + placement-level aptitude + your first real project.
>
> **Gate exam in Month 12 — Core Mastery Certificate + ready for internship applications.**

Month 7–9: DSA Advanced + CS Core Deep

Course	What You'll Learn
🔵 **DSA Mastery for Interviews — Advanced**	Trees, Graphs, DP, Greedy, Tries, Heaps — the real filter of product companies
🔵 **DBMS**	SQL, normalization, transactions, indexing, concurrency
🔵 **Computer Networks**	OSI, TCP/IP, HTTP, DNS — for service + product companies both

Contest level: Hard problems · **Mock OA #1** (company-style online assessment)

Month 10–11: SQL + Aptitude Complete + Web Project

Course	What You'll Learn
🔵 **SQL & Databases Mastery**	Complex queries, joins, optimization — DB rounds
🔵 **Aptitude Bootcamp — Part 2**	DI, LR, verbal — the pattern of every service company OA
🔵 **Web Development Bootcamp**	Full-stack project — the centerpiece of your resume

Month 11 End: Capstone Project 1 — mentor review + rubric grading + deployed live link

Month 12: Resume v1 + Phase 2 Gate

Course	What You'll Learn
🔵 **Resume & LinkedIn Mastery**	ATS-friendly resume, LinkedIn, portfolio

🚩 Month 12 End: PHASE 2 GATE EXAM

- DSA (medium-hard) + OS + DBMS + CN + aptitude full mock
- **Core Mastery Certificate**
- Resume v1 final (mentor reviewed)

Month 12 Milestone:

- 📜 Core Mastery Certificate
- 150+ DSA problems solved
- 50+ contests attended
- 3+ skill certificates
- 1 deployed project + GitHub portfolio
- **Internship applications begin — YES, right now.**

PHASE 3 — SPECIALIZE & INTERVIEW READY (Month 13–18)

> **Goal:** Choose a track, build deep skill, do mock interviews, **convert an internship.**

Track Choice — Pick One (or explore both)

🅰️ TRACK A — Software / Full-Stack SDE

Course / Component	Focus
🔵 **Web Development Bootcamp** (deep dive)	Production-level full-stack
🔵 **Git & GitHub** (advanced workflows)	Team engineering
💼 System Design fundamentals (vault-linked)	L1 SD interviews
💼 Company Vault Sprints	Round-wise PYQs for top companies

Best for: Product companies, startups, full-stack roles, service-to-product switchers

🅱️ TRACK B — AI / Data Science

Course	Focus
🟣 **AI Literacy for Everyone**	Broad foundation of AI
🟣 **Python for AI**	NumPy, Pandas, data wrangling
🟣 **Machine Learning Fundamentals**	Classic ML end-to-end
🟣 **Generative AI Essentials**	Practical layer of GenAI
🟣 **Prompt Engineering Masterclass**	An industry skill for 2026
🟣 **Building Apps with LLMs**	API + RAG apps — a hot skill in interviews
⚪ *(Optional deep)* **Deep Learning with Neural Networks**	NN fundamentals

Best for: Data scientist, ML engineer, AI engineer, research-oriented roles

🌉 Non-CS Branch Students (ECE/EEE/Mech/Civil)

Bridge + Parallel Support:

Course	Purpose
🔵 **Digital Electronics**	ECE/EEE semester + basics
🔵 **Basic Electrical Engineering (BEE)**	EEE semester support
🔵 **Signals & Systems**	ECE core
🔵 **Thermodynamics**	Mech semester
🔵 **Fluid Mechanics**	Mech/Civil semester
🔵 **AutoCAD Fundamentals**	Core branch practical skill
🔵 **Engineering Mathematics I**	Semester support

Plus: Aptitude + DSA + CS core (if targeting IT placements) — service companies hire from 80% of branches; the path prepares exactly that.

Strategy: CGPA stays safe (semester courses included) while placement prep runs in parallel. Dual benefit.

Common to Every Track (Month 13–18)

Component	Count	Details
🎤 **Mock Interviews**	3 included	1:1 expert — resume + DSA + HR rounds, recorded + feedback
🏢 **Mock Drives**	2 included	Full company simulation: OA → coding → technical → HR
📝 **Resume v2**	1	Project-heavy, mentor re-review
💼 **Assignments**	Weekly	Design docs, system design writeups, project milestones
📏 **Skill Tests**	Monthly	Track-specific scored assessments
🏢 **Company Vault Sprints**	2–3 weeks	TCS/Infosys/Amazon/Google-style — company-wise PYQ packs (40% discount included)

🚩 Month 18 End: PHASE 3 GATE

- Track-specific skill test + 1 full mock interview + project portfolio review
- **Interview Ready Certificate**
- Resume v2 final + LinkedIn portfolio live

Month 18 Milestone:

- 📜 Interview Ready Certificate
- 250+ DSA problems solved
- 3 mock interviews cleared
- 2+ real projects deployed
- Internship/offer applications running
- **Got an internship → Fast-lane mode (intensity flexible, path continues)**

PHASE 4 — PLACEMENT WAR MODE (Month 19–24+)

> **Goal:** The offer letter. Company-specific grind + maximum support.

Component	Details
🏢 **Company Sprints**	A dedicated week for each target company: PYQs, round patterns, deep-dive interview experiences
🏢 **Mock Drives ×4+**	Company-simulated drives (TCS-style, product-style, startup-style)
🎤 **Mock Interviews #4–#6**	Company-specific + HR + managerial rounds
📋 **Last-Minute Revision Packs**	Cheat sheets, never-skip topics, rapid revision
📰 **Daily War Mode Drops**	Daily micro-content during placement season + interview debriefs
📝 **Resume v3 + HR Stories**	STAR stories, salary negotiation basics
🆘 **On-call Doubt Support**	Immediate post-interview debrief + next plan

When Placement Is Confirmed:

1. **Report your offer** — self-report + offer letter upload (optional verification)
2. **Alumni status unlocked** — wall of fame + referral network + guide juniors
3. **Final Certificate:** "Placement Ready — TieEdu Path Graduate" (signed + verifiable)
4. **6 months read-only access** + alumni community

If no offer by Month 24:

- **Extension available** (6-month add-on) — with GATE, off-campus, startup prep
- We stay with you until placement happens — extension at a fair price (no hidden traps)
- Honest positioning: system + effort = results; no one can honestly guarantee outcomes — but the preparation system is right here

---

PART E — ASSESSMENT CALENDAR (Full 2 Years)

Assessment	Frequency	What It Checks	Where You See It
🧪 **Baseline Skill Test**	Day 7	Current level — path personalization	Dashboard
🌼 **Daily Quiz**	Daily (60 sec)	Habit + streak	Streak counter
🏆 **Weekly Coding Contest**	Every Saturday 8 PM	Speed + accuracy + rank	Leaderboard
📝 **Weekly Assignment**	Every Sunday deadline	Depth + submission discipline	Score + feedback
🧪 **Monthly Skill Test**	1 per month	Topic-wise mastery	Skill radar
💼 **Mock OA**	From Phase 2, every 2 months	Company OA simulation	Score + analysis
🏢 **Mock Drive**	Phase 3–4 (6 included)	Full company round simulation	Round-wise scores
🎤 **Mock Interview**	Phase 3–4 (6 included)	HR + technical + resume	Rubric + recording
🚩 **Phase Gate Exam**	Month 6, 12, 18	Phase pass + certificate	Certificate portal
📊 **Report Card**	Monthly (auto)	Overall improvement	Email + in-app

PART F — EVERYTHING YOU GET (Complete Deliverables)

📚 Courses (23+, all included)

Programming & DSA (6):

1. Coding Foundations *(free bonus)*
2. C Programming: up to Pointers & Data Structures
3. Python Programming: up to Packages, Classes & Testing
4. DSA Mastery for Interviews (Beginner → Advanced)
5. Git & GitHub Mastery
6. Linux & Shell Basics

CS Core — Interview Level (4): 7. Operating Systems 8. DBMS 9. Computer Networks 10. SQL & Databases Mastery

Career & Aptitude (4): 11. Aptitude Bootcamp (Full — quant + DI + LR + verbal) 12. Resume & LinkedIn Mastery 13. Excel for Students 14. Engineering Mathematics I *(semester support)*

Projects & Full-Stack (1): 15. Web Development Bootcamp

AI Track (7–8): 16. AI Literacy for Everyone 17. Python for AI 18. Machine Learning Fundamentals 19. Generative AI Essentials 20. Prompt Engineering Masterclass 21. Building Apps with LLMs 22. Deep Learning with Neural Networks *(optional)* 23. Generative AI for Students

Non-CS Branch Support (6): 24. Digital Electronics · 25. BEE · 26. Signals & Systems · 27. Thermodynamics · 28. Fluid Mechanics · 29. AutoCAD Fundamentals

🛠 Platform Features

Feature	Description
📊 **Path Dashboard**	Every week's plan, progress bar — where you are and where you're heading
🗺 **96-Week Timeline**	Auto-personalized: branch, college, target role
📡 **Skill Radar**	24-month improvement graph per topic
👥 **Cohort Batch**	With your grad-year + monthly leagues + wall of fame
🔥 **Streak + XP + Levels**	Rookie → Grinder → Learner → **Placement Ready** → Alumni Core
📊 **Monthly Report Card**	Auto-generated: improvement %, weak topics, next month focus
🎯 **Smart Nudges**	Streak risk alerts, at-risk warnings, catch-up plans
📜 **Signed Certificates**	Foundation, Core Mastery, Interview Ready, Graduate — verifiable
📱 **Mobile First**	App-quality mobile experience — anytime, anywhere
🎓 **Sem Exam Week Mode**	Path load auto-reduces during semester exams, streak stays safe

🤝 Human Support (Included Quota)

Support	How Much	When
🎤 Weekly Live Doubt Session	Weekly (recorded)	Full 2 years
🎤 1:1 Mock Interviews	**6 included**	Phase 3–4
📝 Resume Reviews	**3 stages** (v0, v1, v2)	Month 1, 12, 18
🏢 Mock Drives	**6 included**	Phase 3–4
💼 Company Vault Discount	**40% off** any vault pack	Full 2 years
💼 Weekly Assignment Feedback	Rubric-based score + notes	Every week

PART G — 24-MONTH MILESTONE TIMELINE

Month	Milestone	Certificate / Proof
1	Baseline test + Resume v0 + GitHub live + LinkedIn optimized	—
3	25+ DSA problems + 8 contests + streak 30+	Streak badge
6	Phase 1 Gate → Python + C + OS basics done	📜 **Foundation**
9	100+ DSA problems + first Mock OA + skill cert	Skill Certs (DSA, OS)
12	Phase 2 Gate → Resume v1 + project 1 + aptitude complete	📜 **Core Mastery**
15	Track chosen + project 2 + internship applications ON	Skill Certs (track)
18	Phase 3 Gate → Mock interviews cleared + resume v2	📜 **Interview Ready**
20–24	Company sprints + mock drives + real interviews	Interview debriefs
Offer	Alumni + referral network + wall of fame	📜 **Path Graduate**

PART H — CLOSE-UP: ONE WEEK IN DETAIL (Month 8, Phase 2)

So you know exactly what "the system" means — not abstract, concrete:

Day	Exact Activity	Outcome
Monday	Lesson: Graph BFS + 3 practice problems (transition week: Arrays → Graphs)	BFS code written by hand
Tuesday	Lesson: Graph DFS + cycle detection	2 problems solved
Wednesday	Lesson: Topological Sort + 1 assignment problem drops	Assignment understood
Thursday	Practice: 5 problems (medium), weak spots identified	Skill radar: Graphs 45% → 58%
Friday	Lesson: Shortest Path (Dijkstra) + contest problem preview	Ready for contest
Saturday 8 PM	🏆 Weekly Contest — 3 problems (Graph-based), live leaderboard	Rank #18/287 — Gold league
Sunday	📝 Assignment submit: "Implement Dijkstra + unit tests" + quiz	Score 8.5/10, streak 64 🔥

This week's total: 12 hours. 1 contest attended. 1 assignment submitted. Skill radar: Graphs +13%. Streak intact. Cohort rank up.

This is the magic of the system — **not random, directed progress.**

PART I — VALUE STACK (What It's Worth)

If you bought everything separately:

Component	Market Price (approx)
23+ full courses (DSA, OS, DBMS, CN, Python, C, WebDev, AI track...)	₹15,000+
Weekly contests + assignments (2 years, ~150 assessments)	₹5,000+
Monthly skill tests + certificates	₹3,000+
6 mock interviews (1:1 expert)	₹6,000+ (₹1,000 each market rate)
6 mock drives (company simulation)	₹5,000+
3-stage resume review	₹2,000+
Cohort community + leagues + streak system	₹2,000+
Monthly report cards + personalized focus plans	₹3,000+
Company vault packs (40% off on ₹249 packs)	₹500+ saved
TOTAL WORTH	**₹41,000+**

> **Path Price: ₹5,999 one-time (Early Bird: ₹4,999 for first 50)**

≈ ₹8/day for 2 years (the cost of one samosa daily).

EMI available (Razorpay) · Manual UPI verification also supported.

PART J — BY BRANCH: WHAT'S IN IT FOR YOU

Branch	Placement Target	Path Strategy
CSE / IT	Product + Service + Startups	Full path — DSA + CS core + track (SDE or AI) + company sprints
ECE / EEE	Service companies + core electronics + IT switch	Core branch courses (semester) + aptitude + DSA + CS basics for IT roles
Mechanical	Core + IT switch (analytical roles)	Semester courses + aptitude + Excel + DSA basics + WebDev (optional switch)
Civil	Core + Govt + IT switch	Semester courses + aptitude + Excel + DSA basics
All branches	Service companies (TCS, Infosys, Wipro, Cognizant...)	Complete aptitude + DSA basics + CS core + mock OAs — **for every branch**

Key insight: 80% of service companies hire from every branch. Aptitude + DSA + CS core = the common denominator. The path covers exactly that, plus branch-specific semester support.

PART K — FOR PARENTS (This Section Is for You)

> *If you are a parent — this part is for you.*

Concern	Our Answer
"How will my child know the right path?"	The path doesn't decide for them — it provides structured milestones. Every month's report card can reach you too (through your child).
"Monthly subscriptions are too much"	**It's a one-time payment — ₹5,999.** Nothing more for 2 years. EMI is also available.
"Is this just YouTube content again?"	YouTube has content, **not a system.** Here: deadlines, assignments, mock interviews, report cards, mentor reviews — full accountability.
"Is placement guaranteed?"	**No — and no honest platform can guarantee it.** We provide: structured preparation, consistent practice, interview-level mock practice. The student's effort is theirs; the system is ours.
"What about semester exams?"	**Sem Exam Week Mode** — path load auto-reduces, streak stays safe. CGPA and placement both get managed.
"What if the money is wasted?"	**Full refund within 7 days** (≤10% content consumed). After that: pause facility (2×30 days) + extension option. The system is flexible.
"How much time daily?"	1.5–2 hours weekdays, 3–4 hours weekends. **Works on mobile too.**

PART L — FAQ (What Every Student Asks)

Q: What's the benefit of enrolling in 2nd year? I can do it in 3rd year too, right? A: In 3rd year, 18 months of work must fit into 12 months — 90% of students fall behind quickly. **2nd year = comfortable pace + earlier internships + full confidence in placement season.**

Q: What if I miss a month (exams, family reasons)? A: 2 pauses allowed (30–30 days) + streak freezes (2/month) + Sem Exam Week Mode. **Nothing breaks.**

Q: Will I get a placement guarantee? A: **No.** And no honest platform can promise one. We give you: a 2-year structured system + consistent practice + visible progress + interview-level preparation. **Your effort, our system.** Clear upfront, not later.

Q: Is it fit for non-CS branches (Mech/ECE/EEE)? A: Yes — core branch subjects (semester support) + aptitude + DSA + CS basics included. Service companies hire from 80% of branches.

Q: How much daily time? A: 1.5–2 hours weekdays, 3–4 hours weekends. **Consistency > intensity.**

Q: Will I have access after the courses end? A: 24 months from purchase or until placement is confirmed. Extension available. **Certificates are lifetime.**

Q: How do I resolve doubts? A: Weekly live doubt session + cohort community + assignment feedback. In 1:1 mock interviews, direct expert interaction.

Q: Does it work on mobile? A: Yes — mobile-first design. Contests, lessons, assignments — everything on mobile.

Q: What if I want higher studies (GATE/MS) instead of placement? A: CS core + aptitude + DSA foundation also helps for GATE. Phases 1–2 of the path strengthen your GATE foundation too.

Q: Refund policy? A: **Within 7 days, ≤10% content consumed → full refund.** Not after that (the system starts Day 1). Clear, nothing hidden.

PART M — ENROLLMENT

Placement Prep Path — One-Time Purchase

Tier	Price	Includes
⚡ **Early Bird**	**₹4,999**	First 50 students per cohort — everything included
🎯 **Path Core**	**₹5,999**	Full 24-month path + everything included
👑 **Path Pro**	**₹8,999**	Core + 8 mock interviews + priority grading + 2 vault packs + 6 drives + phone support

Payment options: Full UPI/Card (Razorpay) · EMI available · Manual UPI + admin verification

How to Join — 3 Steps

```
STEP 1  Sign up free on TieEdu (30 seconds)
         ↓
STEP 2  Go to the "Placement Path" page → Enroll
         ↓
STEP 3  Day 1: Baseline Skill Test + Cohort allotment + Kickoff session
         Day 2: Every week's plan ready on the Path Dashboard 🔥
```

When Does the Next Cohort Start?

- **Limited seats** per cohort (to maintain quality + mentor ratio)

- Early Bird = first 50 students — price becomes ₹5,999 after that
- Every cohort gets its own kickoff session + batch community

---

Final Word

> *"Two years from now, when placement season arrives, there will be two types of students: One will be panicking — 'What do I do now?' One will say confidently — 'I've done 96 weeks, 150 assignments, 70 contests. Let's go.'*
>
> *The choice is yours — when to start."*

TieEdu — From 2nd year to placement, one purchase, one complete system.

2 hours a day. 96 weeks. One offer letter.
