

TieEdu

LEARN · EVOLVE · DEVELOP

2026-27 · INSTITUTIONAL EDITION

Turn Placement Season Into A Measurable Programme.

TieEdu gives colleges, universities and schools a verified, company-by-company interview intelligence system — with a cohort console your placement cell can actually trust.

• Server-verified pricing

• Watermarked PDF security

• Publicly verifiable certificates

• Cohort-level placement analytics

PLACEMENT CELLS

Cohort readiness, target-company drill-down and verified reports — without a single student form.

FACULTY & PRINCIPALS

One institutional view of how career preparation is actually progressing, cohort over cohort.

STUDENTS

A day-by-day plan for the company they are actually targeting — not a generic syllabus.

PREPARED FOR

Colleges · Universities · Schools · Career Centres

ENQUIRIES

institution@tieedu.in

Placement cells run on guesswork. Students run on forwarded PDFs.

Every campus has the same four problems. None of them are solved by another brochure, another seminar, or another shared drive.

01 The content is unverified

A “Round 2 question bank” circulating in a batch group is often three placement seasons old. Students revise the wrong syllabus for the wrong round — and nobody in the cell can prove which is which.

02 Zero cohort visibility

A TPO cannot answer the only question that matters on drive day: *how many of my students are actually ready for this company’s round 2?* Attendance sheets do not tell you.

03 Every batch restarts from zero

Each senior cohort discovers the process, writes their own notes, and leaves. The knowledge never survives the batch handover, so the institution pays to rebuild the same asset every single year.

04 Last-minute panic

Twenty-four hours before the drive, “what should I revise” has no answer. Revision without a priority order is just re-reading — and the highest-yield topics are exactly the ones nobody flags.

The institution is not short of intent. It is short of a system that can prove who is ready, for what, and by when.

SYMPTOM → CONSEQUENCE → WHAT READY ACTUALLY LOOKS LIKE

WHAT THE CELL SEES TODAY

WHAT IT COSTS THE BATCH

WHAT READY LOOKS LIKE

A question bank with no date on it

Students revise the wrong round, lose hours to it, and walk into the interview less confident than when they started.

Every question carries a source and a visible fact-check date.

Readiness tracked on paper, or not at all

Weak rounds surface only after the company has already rejected part of the batch — far too late to fix.

Readiness per company and per round, visible before the recruiter mail lands.

Notes rebuilt from zero every batch

The institution pays to recreate the same asset in every senior cohort, and quality depends on whoever wrote the notes.

One platform, reviewed once, reused by every cohort that follows.

COST OF THE REPEATS EVERY
BATCH PAYS FOR THE SAME ASSET

Dashed figures are yours to complete with your own campus data before printing.

One platform.

Four things it does that a PDF folder cannot.

Verified drive intelligence

Round-by-round questions, previous-year questions and answers curated from real drive experiences, mapped to the exact round of the exact company.

Official PDF study guides

Every premium module carries an admin-uploaded PDF. Students open it in the built-in reader or download the original — view-only, watermarked, server-checked.

Unlock, then keep it forever

Once a company vault is unlocked, the PDF guides are the student's. Read in the app or download and revise offline — no rent, no renewal, no expiring licence.

A cohort console for the placement cell

Batch readiness, target-company statistics and verified interview reports in one dashboard — computed from live data, never typed in by hand.

HOW A STUDENT ACTUALLY USES IT — FOUR STEPS, START TO OFFER

1

Pick the target

Search the company directory, compare two drives side by side, then commit to one.

2

Generate the plan

Enter company, role and interview date. Get a phased day-by-day plan, resumable any time.

3

Unlock the vault

Buy one round or the complete pack. One purchase unlocks every round of that company.

4

Revise & keep

Use the 24-hour pack, read or download the PDF guides, and keep them for good.

“We are not a static question bank and not a PDF collection. We are a company interview intelligence platform — and every price on it is computed by the server, so what a student sees is exactly what they are charged.”

Inside a company vault.

Each company on TieEdu has a vault. Each round in that company has a module. Every module is built to the same eight-section skeleton, so a student never has to learn a new format from one company to the next.

01 Company Overview & Recruitment Blueprint

Company facts, eligibility criteria, salary structure and candidate reviews.

02 PDF Library

Official study guides, opened in the built-in reader — watermarked, view-only, downloadable after unlock.

03 Core Subjects & Previous-Year Questions

Syllabus mapped by year, so students revise what was actually asked — not a generic list.

04 Technical & Coding Questions

Interview questions with executable code, runnable in the browser sandbox.

05 Quick Cheatsheets

Revision-ready summaries for the ten minutes before walking into the room.

06 Never-Skip Topics

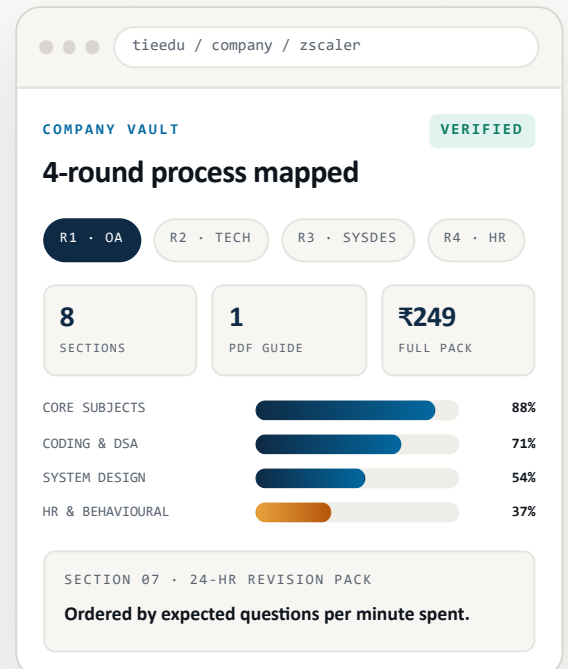

The high-yield topics candidates most often skip and most often get asked about.

07 24-Hour Revision Pack

The single ordered list to work through the night before the drive.

08 HR & Behavioural Round

STAR-model answers and cultural-fit framing, written to be spoken out loud.

Personalised study plans

🕒 Target company, role and interview date in → a day-by-day plan, resumable at any point.

Free before you pay

Every company vault carries one featured free module. A student can judge the quality before spending a rupee.

Runnable code, not screenshots

Coding answers execute in a browser sandbox, so a student can test an approach instead of memorising syntax.

Diagrams for system design

Design rounds are answered with flowcharts and worked trade-offs, not paragraphs to memorise.

Offline once unlocked

The app installs as a PWA and downloaded guides stay readable — useful on a patchy campus network.

The placement cell console.

A shared control plane for Training & Placement Officers. It answers the four questions a placement cell is asked every single week — without asking a single student to fill a form.

Batch readiness

Who has opened which vault, and how far into the eight sections they actually are.

Company target stats

Readiness per target company and per round, so a drive is never announced into a vacuum.

Verified reports

Candidate interview reports carry a fact-check date on the record. Unsourced claims are labelled, not hidden.

Live candidate progress

Progress and XP persist per student, so momentum survives a lab session or a bus ride.

ROLLOUT — FOUR STEPS, ONE DRIVE CYCLE

1 Map the cohort

Final-year batches are onboarded with their branch and target company list. No student paperwork.

2 Shortlist target companies

The cell picks the drives it is targeting. TieEdu already has the round-by-round structure for each.

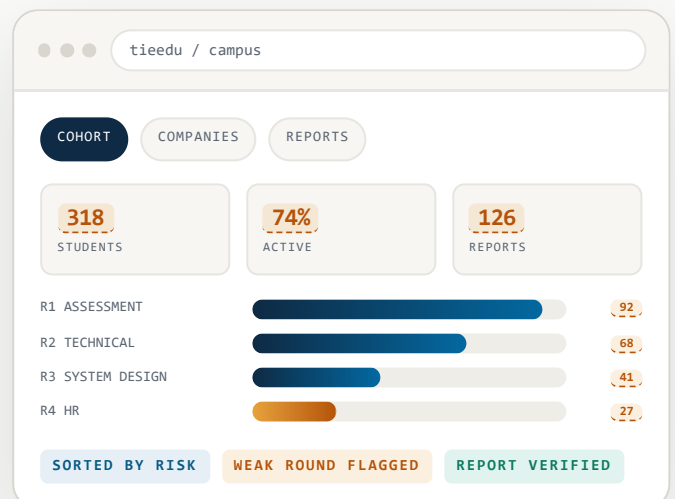

3 Assign and auto-plan

Each student generates a day-by-day plan from company, role and interview date. Progress rolls up automatically.

4 Review before the drive

Readiness by round is visible *before* the company mail lands — so weak rounds get a workshop, not a surprise.

WHAT THE OFFICER SEES

Figures shown are illustrative. Replace with your cohort's live console data before printing.

Does a student need an account?

Yes — one account. Their plan, progress and unlocks then stay with them for the whole cycle.

Can material be re-shared?

Guides are view-only, watermarked per page, and download-by-link is closed server-side.

What if we stop?

Cohort data is exportable at any point. Ask for a sample export during the pilot.

What the campus gets back

An asset that compounds across cohorts, a review meeting backed by evidence, and earlier intervention while a weak round is still fixable.

Career readiness, from class nine onward.

Placement season is not the only window. For schools, the same platform becomes a structured career-readiness track — coding fundamentals, communication, and interview technique, with certificates a student can actually prove.

and Testing**

SERIAL

TIE-XXXX-0000
ED25519 SIGNED

Anyone can verify a certificate without asking the school. The verification key is public, so a recruiter checks it in one link — no login, no email request.

- Public verification page for every serial issued
- Tampering invalidates the signature — detectable by anyone
- XP, streaks and a placement-season leaderboard keep students engaged between drives

Built to be audited, not just bought.

A placement cell cannot adopt a tool it cannot inspect. Every commercial and security decision on this page is enforced in code, not in a policy document.

TRADITIONAL CAMPUS PREP VS. TIEEDU

DIMENSION	SHARED PDFS & WHATSAPP	TIEEDU
Question provenance	Unknown age, no author	Candidate-submitted, moderated, fact-check dated
Mapped to a round	Flat list of questions	Every question tagged to a named round
Revision priority	Everything looks equally important	Never-Skip topics + 24-hour ordered pack
Cohort visibility	Manual Excel, usually stale	Live readiness per company and round
Pricing	Opaque bundles	Computed server-side; shown price = charged price
Content protection	One shared link, no control	Per-page watermark, view-only reader, server-side unlock checks
Outcome proof	Attendance sheets	Progress, XP and verified reports retained per student
Cost per student	Rebuilt every batch	Built once, reused by every cohort

SECURITY & GOVERNANCE

- **Server-authoritative commerce.** The client cannot set a price; the same function that builds the catalogue is the one that charges it.
- **Licensed PDF delivery.** Guides render in an in-app reader with a per-page licence watermark. Download, print and save paths are blocked server-side.
- **Signed certificates.** Ed25519 signatures with a published public key — verifiable by a third party, not by us.
- **Role-based access.** Separate admin, campus and student permissions, with an audit log on privileged actions.
- **Session hygiene.** Short-lived access tokens, rotating refresh tokens with reuse detection, bcrypt cost 12, helmet headers, CORS policy and rate limiting.
- **Protected infrastructure.** Standard HTTP hardening headers on every route, plus device and install tracking for push delivery.

“Without a source is labelled, not hidden and not dressed up.”

— the standard every claim on TieEdu is held to, including ours.

For the placement officer

One dashboard instead of four spreadsheets and a WhatsApp group. Readiness you can defend in a review meeting.

For the HOD / principal

A single institutional view of how career preparation is actually progressing across departments and cohorts.

For the student

One place, one plan, one clear answer to “what do I revise today” — starting from the company they are actually targeting.

Start with one department. Scale to the campus.

STUDENT PRICING — PUBLISHED, NOT NEGOTIATED

WHAT THE STUDENT BUYS	PRICE	EFFECTIVE RATE
1 round of a company	₹99	₹99 / round
2 rounds	₹169	₹84.50 / round
3 rounds	₹219	₹73 / round
Complete Pack (4+ rounds)	₹249	Unlocks the entire company vault
Advanced Data Structures course	₹1,299	Optional, self-paced

Any purchase unlocks the whole company vault — the ladder is a discounting device, never a partial-access promise. Free tracks stay free. Institutional pricing is set separately.

INSTITUTIONAL PROGRAMMES

PROGRAMME	SCOPE	ANNUAL FEE
Pilot	One department, one drive cycle	₹
Department	Full batch, cohort console, workshops	₹
Campus-wide	All departments + school career track	₹

Pilot

Prove it on one drive cycle before you commit a budget.

- One department, one cohort
- Cohort console access
- Post-drive readiness report
- Free tracks for all enrolled students

MOST ADOPTED

Department

Full academic-year coverage for a placement cell.

- Entire final-year batch
- Target-company drill-down
- Faculty / TPO onboarding session
- Verified student certificates
- Monthly readiness review

Campus-wide

Institution-wide, including school career readiness.

- All departments & cohorts
- School / junior college track
- Custom content onboarding
- Dedicated success manager
- Annual impact report

BOOK A 20-MINUTE WALKTHROUGH
